

# AnvilPads™

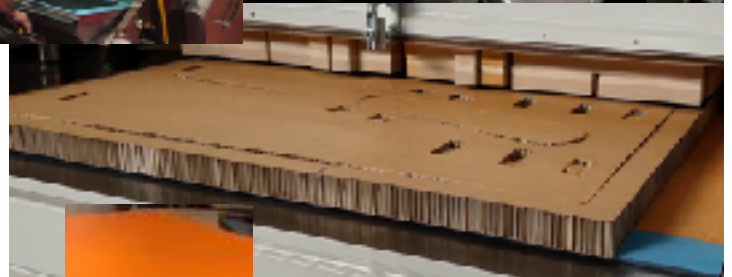

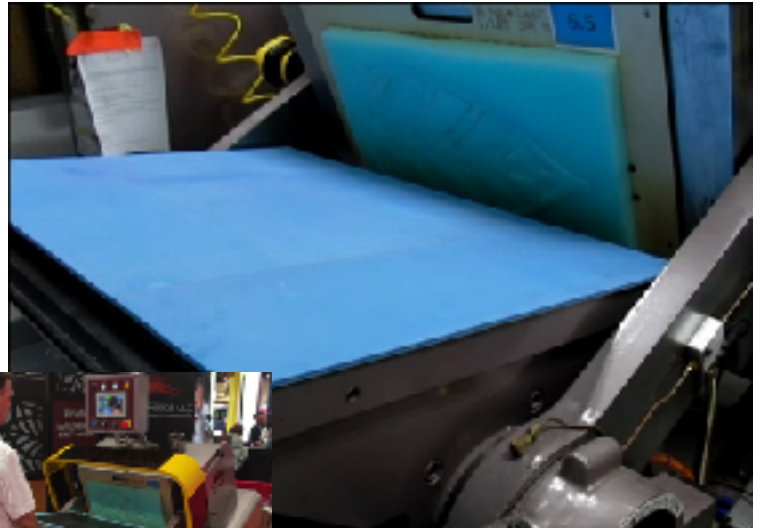

## The new technology for Clamshell die-cutting

**Dicar Magnetic Anvil Pads are the solution for cutting plastic board, honeycomb, or any other materials.**

Dicar Magnetic Flat Anvil Pads have a magnetic or a metal backing and are easy to install and remove on your press. With the Dicar Magnetic Flat Anvil Pads no make-ready process is needed.

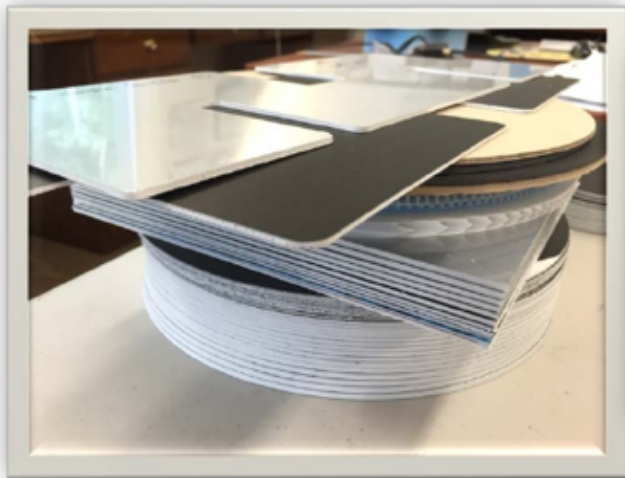

With the special knives you cut completely through materials such as Honeycomb, plastic corrugated and Eska board into the pad. For standard paper and board the standard knives can be used.
